## New from Enduris!

Enrail Vinyl Railing Systems make the perfect accompaniment to your home's front porch, deck or balcony.

**Go on and lean on it – Enrail is durable, sturdy and safe.**

We offer several options of railing, mounting brackets and colors, so you can match or complement your home's architectural style. It looks great paired with composite, vinyl or wood decking, or a concrete front porch. It's a wonderful replacement for old, rotten wood – Enrail is constructed of smooth PVC, so you'll never have to worry about splinters, warping or weathering. Maintenance couldn't be easier; just a spray with your garden hose or an occasional wipe-down with a damp cloth will do the trick.

SERIES 100: 2" x 3.5" Rail Profile

SERIES 200: T-Rail Profile

SERIES 300: Small Contour Rail Profile

## Code-approved vinyl railing with plenty of design options.

Our new Enrail Vinyl Railing System has made it through some rigorous testing for your safety, and we haven't sacrificed any architectural appeal along the way. This railing system is created to be able to withstand all the code requirements as well as the harshest of weather conditions.

The T-Rail and 2" x 3-1/2" Rail profiles can span 6', 8' or 10' widths.  
The Small Contour Rail profile spans 6' or 8'.

### Enrail™ offers a variety of styles—

TWO HEIGHTS – 36" and 42"

THREE SPANS – 6', 8' and 10'

TWO FOOTBLOCK MOUNTING STYLES

THREE BRACKETS – zinc, polycarbonate and PVC

TWO PICKETS – straight picket and baluster

TWO COLORS – white and tan

*Choose straight picket or ornamental baluster to complement your home's style.*

discovering new boundaries

### SERIES 100

Strength and simplicity – that's our 2" x 3.5" railing. This design is straightforward and contemporary, and works well with masonry, vinyl siding or wood clapboard.

### SERIES 200

The strong shadow lines of our T-Rail system add real architectural appeal to any style of residence.

### SERIES 300

The soft curves of our Small Contour rail system work to conceal the amazing strength inside.

Trust Enrail for a  
lifetime of performance  
and good looks.

We've engineered this  
railing system for a  
higher standard of living.

**ENRAIL VINYL  
RAILING SYSTEMS**  
Code-Approved, with  
plenty of design options.

Enrail vinyl railing is manufactured utilizing a precise combination of components that can give you both the design and higher performance you are looking for.

We've developed a low-maintenance railing system that has great architectural appeal for today's homes, and long-lasting durability that will keep Enrail beautiful for decades to come.

Enrail vinyl railing stands tall in most any harsh weather conditions.

Low maintenance means virtually no maintenance – with Enrail, there's never any rotting, warping or chipping. And there's no need for painting, ever again.

*Please Note:* Enrail Vinyl Railing Systems are code approved for one and two-family dwellings and residential. We have certified the Series 100 and Series 200 Railing System to work with both premium brackets at up to 10' spans, and with more cost-effective (but still amazingly strong) PVC brackets with spans of 6' and 8'. The 6' and 8' spans require metal inserts in the top rail only.

The Series 300 Railing System can span from 6' to 8' widths using polycarbonate or PVC brackets.
